

# 1941 Global Command Decision Manual

by Black Elk (graphics/testing) & TheDog, (code/testing)

## Introduction

It is late 1941, Germany's invasion of USSR is well under way. Japan is about to strike in the East.

## MAP FEATURES

### AI FRIENDLY

- Intended for **Solo** play vs Fast AI opponents, can use Hard AI for more consider play, but turns will take longer
- **81** territories are marked as important to players to guide the AI for better play
- no Objectives, or Politics/Technology phases, both are scripted.

### STACKING

- Stacking limit is enforced to help the AI and player so they don't over stack.
- Only **10 Air** & **10 Sea** units are allowed per Sea Zone/Territory, except 2 Hit Battleship, Carrier & Carrier-Fleet **5** units per Sea Zone
- Only **20 Land** Units per territory, except 2 Hit Armor-Inf & Armor-Hvy **10** units per territory
- Only **1** (Industry-Hvy, Industry-Med, Industry-Lgt, Base-Camp) is allowed per territory
- Allied stacks are typically ½ the limits above, eg 5 Allied Air & Sea units. Except Convoy units where 10 allied Convoy are allowed

### GAME PLAY

- **Turn sequence;** PU Resources (from previous turn), Combat Moves, Non-Combat Moves, Repairs, Purchases then Placements.
- **Battle Rounds:** Land Battles last up to **7** rounds, Sea Battles **5** rounds, Air Battles **3** rounds; these can be changed in map options. This feature encourages you to over commit to ensure a victory in a turn. Having limited Battle Rounds can result in battles being a draw, shown by a colored hatched pattern. Land AA fire is only for **2** rounds. Sea AA fire is only for **2** rounds. The territory/Sea Zone PU is not collected until it is resolved.

- **PU** resources are collected from territories at the **start** of the round. This means that losses and gains in territories PU is not taken into account until the start of the next round, so after all other players have had their turn.

## RAILWAYS

- Each Industry has invisible rail links that allow land units to move a total of 3 territories per turn.

## TECHNOLOGY

- Is pre-planned and it will occur from a certain round with a small random chance, so cannot be relied on, see each nations starting panel.
- Map rounds are loosely 3 months, so 4 to a year, this is for the benefit of the scripted Technology advances, but don't treat this as a hard fact.

## UNITS – HQ Commands

Four types of HQ Commands, Air, Army, Fleet and Submarine, nations can have between 0-5 types of a HQ. These represent Manstein, Montgomery, Patton, Cunningham, Donitz, Nimitz, US 8<sup>th</sup> Air Force HQs etc. and their staff and equipment.

## ANTI AIR (AA)

- There is no AA ground unit, instead each unit has its own built in AA defense.
- Typically moving ground units have an AA defense of 1 in 6, more units equals more AA defense.
- Ships have higher AA defense between 1 for Destroyers to 3 for Battleships.

## UNIT STATS

- Unit Stats are not your typical WWII stat block, so play with an open mind.
- Eg. Fighter has **1 Atk**, **1 Def** verses ground units and **3 Atk**, **3 Def** verses aircraft
- Eg. Bomber has **1 Atk**, **1 Def** verses ground units, **no** attack v ships, best used to Strategic Bombing Raid (SBR) industries
- Eg. Destroyer has **1 Atk**, **1 Def**, **3 Move** and costs 5pu.
- Eg. Cruiser has **2 Atk**, **2 Def**, **3 Move** and costs 8pu.
- Eg. Convoy has **0 Atk**, **1 Def** verses Submarines, so is Anti-Submarine as it includes Corvettes & Frigates

## SEA ZONES GENERATE PU

- Sea Zones generate **1-2pu** per round, these values are **not** shown on the map, only in the status bar. This means the Battle of the Atlantic is free range & roaming, while Britain and the US should hunt down the U-boats.
- Typically the Sea Zone adjacent to a “canal” like Panama Canal, Danish Straits, Gibraltar Straits, Suez Canal are **2pu**. However Bosphorus Straits and Dardanelles Strait Sea Zones are only **1pu**. (As it was closed to most nations)

## BLOCKADE

- Each enemy coastal territory can be Blockaded up to the value of the Territory PU
- Each Destroyer, Cruiser, Battleship causes Blockade of 1, meaning loss of **-1pu** to the enemy territory
- Each Submarine, any type causes Blockade of 2, meaning loss of **-2pu** to the enemy territory

## POLITICS

Is scripted, Brazil, Gulf States and Mexico will always join the USA on certain rounds.

### USSR has special border controls (\*1 see following page)

The allies cannot enter USSR territory, as Stalin refused allied units on USSR soil. However as the allies can retake USSR territory and give it back to the USSR, it is possible to have allied units unable to move or be reinforced if surrounded by USSR territories, so be aware of advancing too far into USSR territory. Best to stay on the edge, like at Baku and not advancing deeper.

### Japan & USSR Non-Aggression Pact

- Rounds 1-10+ The **USSR** and **Japan** have a Non-Aggression Pact that prevents both sides from attacking each other.
- Round 11+ there will be skirmishes on their borders.
- Round 12+ there is a 1 in 3 chance the NAP will be broken and war will be declared.

## Of Note

- Be aware that Allied relationship has **givesBackOriginalTerritories**, this means that if you hold or take an allied Original Territories it goes to that ally, not to the faction that took/holds it.

# POLITICAL RELATIONSHIPS

By pressing Ctrl+W shows the Political Relations panel

## GAME PLAY

It is a **large** map, with almost **800** (796) land & sea locations and is intended for;

- solo play with the remaining nation's using **Fast AI** or Hard AI. It is AI friendly, no Objectives and Politics/Technology are scripted
- 2 sided play, eg. 3 Axis nations verses 5 Allied nations
- Can **Use/not use** or **AI=Do Nothing**, all factions, to learn to play for faster game play.

Protagonist	Includes	Alliance	Notes

## GUIDE TO NON-MOVING UNITS

- Industries generate 5-9pu per turn
- Industries have invisible “rail links” and can move land units up to 3 territories, depending on terrain effects. Sometimes this produces inconsistencies in move 2 units like armor over mountains, where they cannot move 3, work around it.
- Factories, each Factory generate 3pu per turn

	Units	Generate PU / turn	Territory	Max Unit Production / turn	Notes
	Base-Camp	0	Not in an industry territory Place in a 1+pu territory	1	Produce: Inf-Conscript, Inf-Trained, Inf-Elite, Inf-Motorized
	Industry-Lgt	5	Only 1 industry allowed Place in a 5+pu territory	2	Produce: As above & Armor-Lgt, Artillery, Bunker, HQ Army
	Industry-Med	7	Only 1 industry allowed Place in a 7+pu territory	3	Produce: As above & all Fighters, Bomber-Tac, Armor-Med, Anti-Tank, Destroyer, Convoy
	Industry-Hvy	9	Only 1 industry allowed Place in a 9+pu territory	4	Produce: As above & Air-Transport, Bomber, All-Rockets, Armor-Hvy, Cruiser, Battleship, Carrier, All Submarines, all HQ
	Factory	3	Up to 2 / Territory. Place with any Industry-Med or Industry-Hvy	-	Simulates increased production, if the war effort can afford the investment. ROI after 3 rounds.
	Lend-Lease-Depot	1	Vary 8-20 in a territory, generating 8-20pu/turn		Vital to USSR as they have 3 & China has 1.
	Oil-Field	1	Vary 1-20 in a territory, generating 1-20pu/turn		Cannot be destroyed

# PU GAIN & LOSS

## PU Gain per turn

- Each Land Territory generate **0-9pu**
- Each Industry-Lgt, Industry-Med, Industry-Hvy respectfully generate **5, 7 or 9pu**
- Each Factory **3pu**
- The 4 Lend-Lease-Depot generate **8-20pu**
- Oil-Fields generate **1-20pu**
- Each Sea Zone generates **1-2pu** per turn, the owner of the PU has a national flag in the Sea Zone

## PU Loss per turn

- Each unit (except Base-Camp, Lend-Lease-Depot, Industries, Factory) consumes an Upkeep/Maintenance **-1pu**
- Each 2HP unit (Armor-Inf, Armor-Hvy, Battleship, both Carriers, not Bunker) consumes an Upkeep/Maintenance **-2pu**
- All land territories bordering Sea Zones can be blockaded. There are no convoy centers/route/zones.
  - Each Blockading enemy ship (Destroyer, Cruiser, Battleship) reduces PU by **-1pu**
  - Each Blockading enemy Submarine (HQ-Submarine, Submarine, Submarine-Adv) reduces PU by **-2pu**

## MOVEMENT

The 3 Industries Hvy, Med, Lgt have a built in Rail Links that allow land units that move 1 and move 2 to move 3 territories if starting in an Industry territory. This is important for moving units across Europe, Asia and the USA.

### Terrain Effects

Below is a list of the terrain effects;

<b>Desert</b> Atk: All Air +1 Def: Inf(not Mot), Anti-Tank +1 Move: No Blitz 	<b>Mountains</b> Atk: 2+ are -1 Def: Inf(not Mot), Anti-Tank +1 Move: All Ground move 1, No Blitz

## UNIT SUPPORTS

Unit Giving support	Receiving Allied Unit gains <b>+1 Atk</b> & <b>+1 Def</b>	Applies to these nations
HQ-Air	<b>Dog Fight:</b> 5 Allied Bomber, Bomber-Tac, Fighter, Fighter-Early, Fighter-Jet, Fighter-LongR <b>Land/Sea:</b> 5 Allied Bomber, Bomber-Tac, Fighter, Fighter-Early, Fighter-Jet, Fighter-LongR	Britain, Germany, Italy, Japan, Pacific-Allies, USA
HQ-Army	<b>Dog Fight:</b> 5 Allied Bomber, Bomber-Tac, Fighter, Fighter-Early, Fighter-Jet, Fighter-LongR <b>Land:</b> 5 Allied Anti-Tank, Armor-Hvy, Armor-Inf, Armor-Lgt, Armor-Med, Artillery, Inf-Conscript, Inf-Elite, Inf-Motorized, Inf-Trained	All
HQ-Fleet	<b>Dog Fight:</b> 5 Allied Bomber, Bomber-Tac, Fighter, Fighter-Early, Fighter-Jet, Fighter-LongR <b>Sea:</b> 5 Allied Battleship, Cruiser, Destroyer, Submarine, Submarine-Adv	Britain, Italy, Japan, Pacific-Allies, USA
HQ-Submarine	<b>Sea:</b> 5 Allied Battleship, Cruiser, Destroyer, Submarine, Submarine-Adv	Germany

Unit Giving support	Receiving Allied Unit gains <b>+1 Atk</b>	Applies to these nations
Fighters	Bomber-Tac (Combined-Arms)	Britain, Germany, Italy, USA
Armor	Bomber-Tac (Combined-Arms) or Inf-Motorized (Combined-Arms)	Britain, Germany, Italy, USA
Bomber-Tac	Inf-Trained, Inf-Elite, Inf-Motorized, Anti-Tank, not Inf-Conscript (Combined-Arms)	Britain, Germany, Italy, USA
Artillery	Inf-Trained, Inf-Elite, Inf-Motorized, Anti-Tank, not Inf-Conscript	All

Unit Suppressing	Enemy Unit Suppressed, suffer	Applies to these nations
Artillery	Base-Camp, Bunker (suffer <b>-1 Def</b> )	All
Bomber-Tac	Base-Camp, Bunker (suffer <b>-1 Def</b> )	All
Anti-Tank	All-Armor, Inf-Motorized (suffer <b>-1 Atk</b> )	All

As can be seen not all Nations can give and receive the same supports.

- **HQs** are vital to winning the war and are your most important asset.
- Britain, Germany, Italy, USA can use **Combined-Arms**, the synergy of combined arms, Fighters, Tactical Bombers, Armor and Infantry. Germany being mainly land based benefits the most.
- To counter enemy **Armor** try to face it off with **Anti-Tank** to reduce/blunt its attack.
- Bunkers play a vital role in this game and to increase your chances of success bring **Artillery** and **Bomber-Tac** to suppress them.

## HOW TO MAXIMIZE YOUR CHANCES OF WINNING A TERRITORY WITH 2 ENEMY BUNKERS

- Attack with 1-2 Artillery per Bunker to suppress it and at least 4 Inf-Trained or Inf-Elite to get +1 Artillery Support
  - Attack with 1-2 Bomber-Tac per Bunker to suppress it
  - If you have Inf-Conscript use them in the Attack to lead the attack so they are casualties, before your Inf-Trained
  - If the Territory has Terrain Effects, like a Mountain, try to attack with a HQ-Army to mitigate the bad effects
  - If the Territory, is coastal use many Inf-Elite (Marines get +1 Attack if sea borne) with Bombard support from Battleships & Cruisers
  - Land Battles end after 7 rounds of combat, this is deliberate to encourage over committing units to ensure a win
  - If a Combined-Arms nation (Germany, Italy, Britain & USA) try to pair as many units, on a 1 for 1 basis, as possible to maximize their support bonus synergy
- 
- Check the status bar terrain type you are attacking and the note the terrain effects
  - Check the Tool Tips for each unit, especially the lines with asterisks (\*) as they may guide you
  - Check this manual, it has words/stats of wisdom
  - As a guide the game tries to use military histories 3 to 1 rule to win. (Remember this a TripleA game and not A&A game)
